

Sage 200 Business Intelligence

Introducing Sage 200 Business Intelligence for Sage 200 v5.10

As a leading supplier of software for businesses of all sizes, Sage is uniquely positioned to ensure you receive the maximum benefit from your business systems and data. Our Business Intelligence solutions enable you to extract real intelligence about your business from data accumulated every day in the normal course of operations.

The most recent addition to our range of Business Intelligence solutions and to the Sage 200 Suite is Sage 200 Business Intelligence (BI). Sage 200 BI is a new and exciting addition to the Sage 200 Suite. The first phase of this exciting release delivers the ability to report and analyse on the financial data within Sage 200. However, this is just the start with further releases planned which will allow you to report and analyse on commercials, CRM and Project Accounting data.

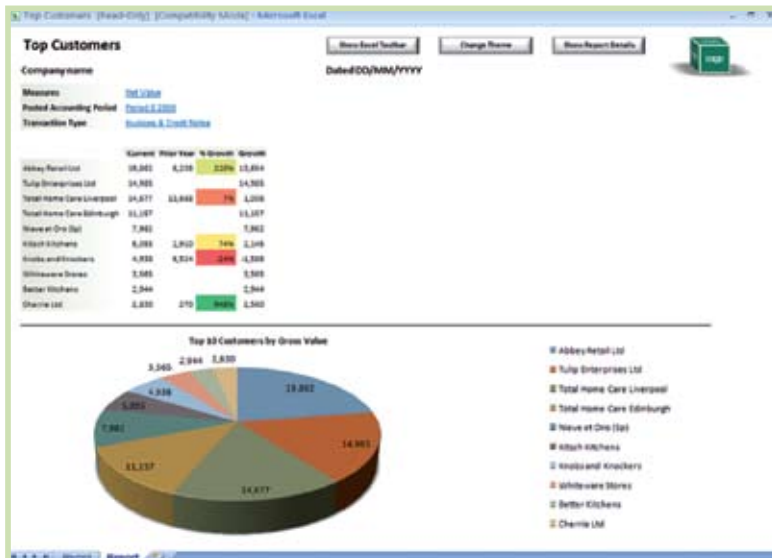

Sage 200 Business Intelligence Features:

- Reporting and analytics within the comfort of Microsoft Excel.**

Sage 200 BI brings business data into the familiar Microsoft Excel environment allowing quick analysis of company data from many different angles. This means the features of Excel, such as ease of formatting (layout and printing), calculations and macros can all be used to enhance the reports created using Sage 200 BI.

- Pre-defined reports out-of-the-box.**

Sage 200 BI is supplied with time saving, pre defined reports allowing you to analyse and understand financial information within your Sage 200 solution. For example - Profit & Loss report, worst paying customers, average sales month on month, and Top Customer as shown below:

continued on next page.

■ **Easy to understand terminology and usage.**

Sage 200 BI can be used and understood by all customers regardless of your technical ability as there is no technical knowledge or pre-requisites required to use the tool.

■ **Make faster, more informed and confident decisions.**

Sage 200 BI provides quick and easy access to information that has not typically been available through Sage 200. The report fields can be easily changed in seconds to allow quick and easy reporting and analysis.

■ **Save essential time on reporting.**

Sage 200 BI provides a superior alternative to complex spreadsheet reporting with reports easy to create, from easy to access data that is automatically refreshed. Sage 200 BI gives one version of the truth and reduces the need for complex time consuming spreadsheets which require manual intervention and manipulation.

■ **Easy and fast deployment.**

A fast and easy tool which can be deployed across the business in a few hours with minimal disruption to your business.

■ **Uses reliable Microsoft SQL Server Analysis Services.**

Sage 200 BI uses SQL Server Analysis Services which is a market leading OLAP technology. Therefore Sage 200 BI is built using market leading Microsoft technology.

■ **Report Wizard.**

Sage 200 BI comes with a report wizard as standard. The report wizard is a powerful editing tool which provides flexibility and ease of use by enabling you to extract the information you require and display it the way you want.

■ **Drill down.**

Allows the you to easily go from a summary report to detailed analysis on specific items in the report. You can drill down through increasing levels of detail or to the transaction data for more detailed analysis.

■ **Drill To Detail.**

Provides you with the ability to analyse to a transactional level to allow further detailed analysis of your data. Drill to Detail allows you to show the underlying values that make up the totals that are shown in a report.

■ **Change the report parameters.**

Enables multi-dimensional analysis, by allowing you to quickly flick between data by changing the report to get a different view of your data and a better insight of your business.

■ **Sort, Filter and subtotal functionality.**

This functionality allows the data to be manipulated making it easy to view and analyse. These additional features provide additional flexibility allowing you to create the reports you require to suit your business needs.

■ **Conditional Formatting.**

Provides a very quick and easy method of spotting exceptions within a report by highlighting anomalies within your data, thus saving you valuable time.

■ **Dynamic Charts.**

Add charts to reports to give a graphical representation of the data - ideal for presentations and reporting.

continued on next page.

- **Ad-hoc analysis via Report Layout Panel.**

Provides full flexibility to create reports, which can be configured and designed specifically for your requirements.

- **Flexible layout options to produce formal reports.**

Produce professional and aesthetic reports and dashboards quickly and easily – ideal for use in presentations. You can layout all forms of reports exactly as required within Microsoft Excel. You can also build dashboard reports with multiple linked queries and charts as seen below:

- **Report Sets.**

Automate the creation of multiple reports to create report packs and save time on reporting.

- **Link reports.**

Allows you to create a dashboard of a number of reports that can all be linked and updated together by enabling synchronisation between reports within a workbook.

- **Insert user defined rows and columns into reports.**

Add additional rows or columns in a report to add additional calculations using Excel formulae to meet reporting needs. Increasing flexibility to utilise Excel functionality within a Sage BI report.

- **Named Sets.**

Save time and improve reporting by creating sets specific to the business. For example, create a set for the last 6 months to quickly be able to show data for each of the previous 6 months.

- **Calculated Members.**

Extend reports by creating additional calculations as required. You can define additional calculations based on existing data within a report.
